

## ABSTRACT OF THE DISCLOSURE

Disclosed is a pair of golf shoes, each comprising an outsole provided with a plurality of spikes protruded from a lower surface of the outsole, in which the lower surface of the outsole is inclined from an outer edge of the outsole to an inner edge of the outsole so that the spikes at the inner edge of the outsole have a height larger than that of the spikes at the outer edge of the outsole, and the spikes respectively have heights so that an upper surface of the outsole is substantially parallel with a ground. The golf shoes allow golfer's feet to be stably mounted on the surface of a green, thereby assisting a golfer in taking a stable position during address and swing motions.
